

Shark®

QUICK START GUIDE

Robot Pod Replacement

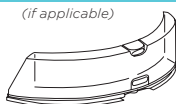

BEFORE SETTING UP YOUR NEW ROBOT, YOU WILL NEED TO REMOVE THE FOLLOWING PARTS FROM YOUR EXISTING ROBOT:

Robot Dust Bin*

Fluid Reservoir

(if applicable)

Side Brush*

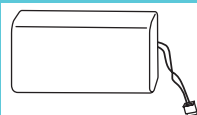

Brushroll Door

Brushroll

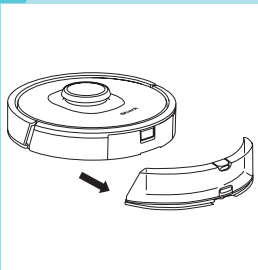

Battery

**Design may vary based on robot model.*

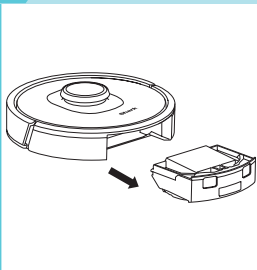

1 Remove Fluid Reservoir*

Remove the fluid reservoir by pressing the fill port button and sliding the reservoir out.

**If applicable; based on robot model.*

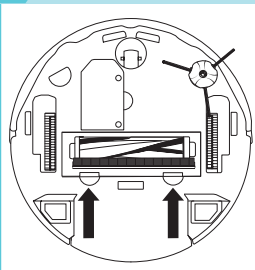

2 Remove Robot Dust Bin*

Press the **Dust Bin Release Buttons** and slide out the dust bin.

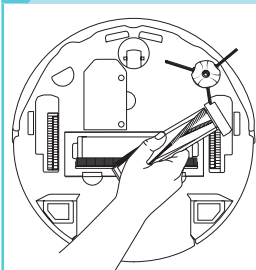

**Dust bin design varies by model.*

3 Remove Brushroll Door

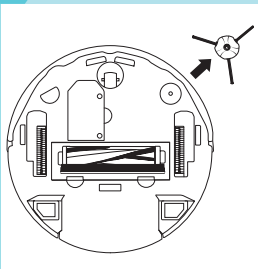

Turn over the robot. Push up on the tabs of the brushroll door, then lift off the door.

4 Remove Brushroll

Lift out the brushroll.

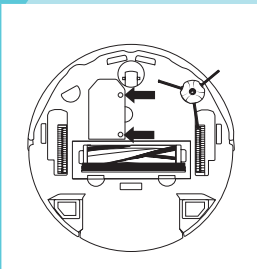

5 Remove Side Brush*

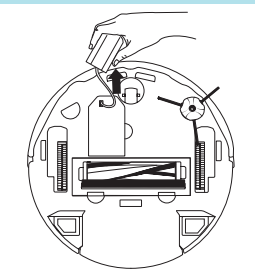

Lift off the side brush.
Note: Do not unscrew.

**Side brush design and quantity vary by robot model.*

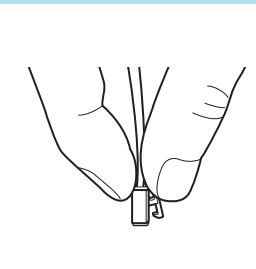

6 Remove Battery

Unscrew the 2 screws that hold the battery cover in place.

Use the pull tabs to lift the battery out of the compartment.

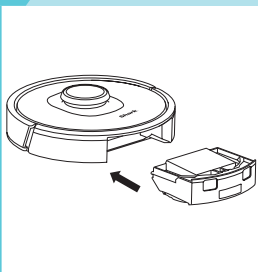

Press down on the wire connector tab and lift the wire connector from the base of the robot.

Turn Page ➡

NEXT, INSTALL EACH PART INTO YOUR NEW ROBOT:

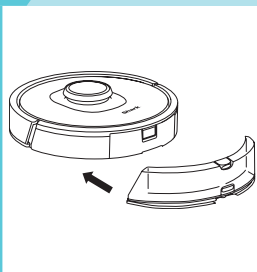

1 Insert Robot Dust Bin

Slide the dust bin into the robot until it clicks into place.

**Dust bin design varies by model.*

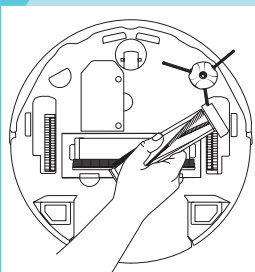

2 Install Fluid Reservoir*

Insert the fluid reservoir by sliding the reservoir in until it clicks into place.

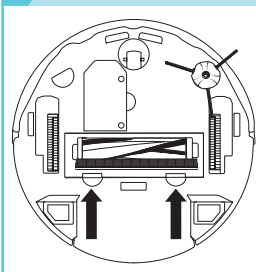

**If applicable; based on robot model.*

3 Attach Brushroll

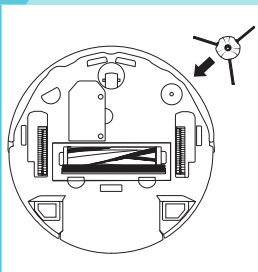

Reinstall the brushroll by inserting the flat end first. The colored end cap will match the color of the insertion point.

4 Attach Brushroll Door

Close the brushroll door and press down until both sides click into place.

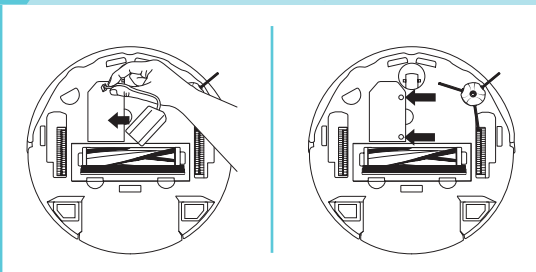

5 Attach Side Brush*

Align the side brush over the post on the bottom of the robot, then press down until the brush clicks securely into place.

**Side brush design and quantity vary by robot model.*

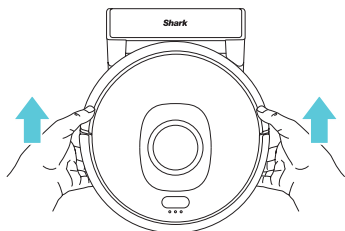

6 Insert Battery

Unscrew the battery door and set the screws aside. Push the wire connector tab into the robot and insert the battery into the compartment with the pull tabs facing up

Replace the battery cover and screw it into place.

Robot Setup

Place the robot on the dock. When aligned correctly on the dock, the robot will power on and start charging. The dock LED light will turn blue when the robot is charging.
