# Shark. **Air Purifier HP070** Series

## **OWNER'S GUIDE**

### **IMPORTANT SAFETY INSTRUCTIONS** HOUSEHOLD USE ONLY

## A WARNING

### TO REDUCE THE RISK OF FIRE, ELECTRIC SHOCK, OR INJURY:

#### **GENERAL WARNINGS**

- This appliance has a polarized plug (one blade is wider than 1. the other). To reduce the risk of electric shock, this plug is intended to fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not attempt to defeat this safety feature. Unplug or disconnect the appliance from the power supply before servicing.
- 2. DO NOT operate any unit with a damaged cord or plug. Discard the unit or return to an authorized service facility for examination and/or repair.
- 3. DO NOT run cord under carpeting. DO NOT cover cord with throw rugs, runners, or similar coverings. **DO NOT** route cord under furniture or appliances. Keep cord away from high traffic areas where it will not be tripped over.
- 4. If the power cord is damaged, it must be replaced by the manufacturer, its service agent, or similarly qualified persons in order to avoid a hazard.
- 5. This appliance should only be placed on flat and dry surfaces.
- 6. This appliance is not intended for use by anyone (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- 7. Children should be supervised to ensure that they DO NOT play with the appliance.
- 8. Cleaning and user maintenance shall not be made by children without supervision.
- 9. Prior to cleaning or other maintenance, the appliance must be unplugged from the electrical outlet.
- **10. DO NOT** handle plug or appliance with wet hands.
- 11. DO NOT use without filter in place.
- 12. Only use Shark<sup>®</sup> branded filters and accessories.
- **13. DO NOT** damage the power cord:
  - a) DO NOT pull or carry appliance by the cord or use the cord as a handle.
  - b) DO NOT unplug by pulling on cord. Grasp the plug, not the cord.
  - c) **DO NOT** stand the appliance on the power cord, close a door on the cord, pull the cord around sharp corners, or leave the cord near heated surfaces.

- 14. DO NOT use with any opening blocked; keep free of dust, lint, hair, and anything that may reduce airflow.
- 15. DO NOT use if airflow is restricted. If the air paths become blocked, turn the appliance off and unplug from electrical outlet. Remove all obstructions before you plug in and turn on the unit again.
- 16. DO NOT use if appliance is not working as it should, or has been dropped, damaged, left outdoors, or dropped into water.
- 17. DO NOT place appliance on unstable surfaces such as chairs or tables.
- **18. DO NOT** use in the following areas:
  - a) Wet or damp surfaces
  - b) Outdoor areas
  - c) Spaces that are enclosed and may contain explosive or toxic fumes or vapors (lighter fluid, gasoline, kerosene, paint, paint thinners, mothproofing substances, or flammable dust)
- **19.** Turn off all controls before plugging in or unplugging the appliance.
- 20. Unplug from electrical outlet when not in use and before any maintenance or cleaning.
- 21. Hand wash exterior/hard plastic/non-electronic parts with water only. Do not immerse. Cleaning with chemicals could damage the unit.
- **22.** Make sure filter is in place after routine maintenance.
- 23. Not suitable for use with solid-state speed controls.
- 24. The appliance is only to be used with the power supply unit provided with the appliance.

# SAVE THESE INSTRUCTIONS

#### SETTING UP YOUR AIR PURIFIER

#### Parts:

- 1. Air Output Vents
- 2. Control Panel
- **3.** Front Display
- 4. Air Purifier Body
- 5. Air Intake Vents
- 6. Mesh Dust Filter
- 7. HEPA Filter
- 8. HEPA Filter Door

#### TIPS FOR SETTING UP YOUR AIR PURIFIER

- Make sure the front panel of the air purifier faces away from the closest wall.
- Do not move the unit while it is running. Turn off the power and unplug the air purifier before moving it.
- · Make sure the air intake vents are not blocked.
- Do not place anything on the air purifier.
- Do not place the air purifier near heaters or radiators.
- Keep the air purifier out of direct sunlight and away from water or other liquid.
- Keep all nearby doors and windows closed when operating the air purifier.
- Avoid using in very humid environments.

1. DO NOT plug in the air purifier. First, carefully turn the air purifier upside down and place it on a level floor surface. Rotate the filter door counterclockwise to unlock it, then lift it off to access the HEPA filter.

2. Take the HEPA filter out of its plastic packaging. Reinstall the HEPA filter in either orientation.

**3.** With the HEPA filter reinstalled, rotate the filter door clockwise until it clicks into place.

 Set up the air purifier on a level surface, at least 3 inches (8 cm) from walls and objects.

**5.** Carefully remove the yellow sticker on the front of the air purifier to access the display panel.

Plug the air purifier into an electrical outlet and press the power button on the top control panel.

**6.** When the power is on, the air purifier will begin to analyze the air quality, indicated by the rotating lights.

After a few seconds, the air purifier will display the current air quality.

If the air quality is between 96% to 100%, the number on the display will spin every five minutes to indicate that the machine is actively monitoring and cleaning the air.

#### CONTROL PANEL

There is a control panel on the top of the air purifier and a display screen on the front.

#### TOP CONTROL PANEL

#### FRONT DISPLAY SCREEN

Displays the current air quality status based on the Air Info mode selected on the top control panel.

#### **TOP CONTROL PANEL BUTTONS**

#### **Tips and Tricks:**

**Optimize Performance in Eco Mode:** After 100% clean air status is achieved for 5 minutes in Auto Mode, your air purifier will enter Eco Mode. Your unit's filter life will be optimized.

()+&=== () **Turn Off Beeping:** To turn off notification sounds, press and hold the Air Info and Fan Speed buttons at the same time for two seconds. To resume, press and hold both buttons again.

#### AIR INFO SETTINGS

The built-in sensor detects your air quality to give you real-time information. Use the **AIR INFO** button (i) to switch between air quality display options.

INFO	FRONT DISPLAY SCREEN	REAL-TIME READING
% CLEAN AIR		Displays the air quality rating: • Poor: 0%-69% • Fair: 70%-84% • Good: 85%-100% % CLEAN AIR uses particulate matter (PM) air quality standards as determined by the EPA to calculate the air quality rating.
PARTICLE SIZES		The PM (particulate matter) value is the amount of particulate in your air, measured in micrograms (μg) per cubic meter. Your air purifier measures three particle sizes, PM1, PM2.5, and PM10.
PM1	150x	Displays the number of PM1-sized particles in your air, including ultra-fine allergens.* *Allergens refers to non-living matter.
PM2.5	150x	Displays the number of PM2.5-sized particles in your air, including smoke.
РМ10	150.	Displays the number of PM10-sized particles in your air, including dust and pollen.

#### UNDERSTANDING YOUR AIR QUALITY

The rings on the front display will change color as your air quality changes, allowing you to easily monitor your air quality even when the air purifier is across the room.

Note: The air quality sensor uses a cumulative particle count across all particle sizes to determine percentage of clean air.

#### OPTIMIZING FAN SPEED

Your air purifier has 5 speed settings plus Auto Mode. Adjust fan speed to optimize your cleaning performance.

DISPLAY	SPEED	BEST FOR
	Αυτο	Optimizing HEPA filter life
	1-2	Quiet operation
	3-4	Reducing odors
	5 (MAX)	Maximum purification and debris capture

#### TROUBLESHOOTING AND FREQUENTLY ASKED QUESTIONS

Product	What are the recommended settings?	We recommend using this air purifier in Auto Mode. Auto Mode leverages your air purifier's particle sensor, and this adjusts the fan speed automatically. Higher fan speeds work best for reducing odors and capturing debris most effectively.	
	Where should I set up my air purifier?	We recommend setting up the air purifier in the room of your home where there is the most activity. This will help to clear the air of pollutants and odors as they are introduced. Note: This model is recommended for smaller rooms.	
	What is Eco mode?	After 100% clean air is achieved for 5 minutes in Auto Mode, your air purifier will enter Eco Mode. The fan will turn off until a significant number of particles are detected, optimizing your HEPA filter's life.	
	Can I mute the air purifier, so it doesn't beep when pressing the buttons?	To turn off notification sounds, press and hold the Air Info (i) and Fan Speed & buttons at the same time for two seconds. To reactivate sounds, press and hold both buttons for 2 seconds again.	
	Why are the top control panel buttons not working?	Your air purifier may have the child lock setting activated. Press and hold the Brightness $\divideontimes$ and Fan Speed $\$$ button for two seconds to turn this setting on or off.	
Air Quality	Why is my air quality always at 100%?	If your air purifier displays a blue ring, your air quality is good. However, air quality will fluctuate as you introduce pollutants into your home. Activities like smoking, cooking, dusting, or spraying cleaning products (among other things) can add pollutants to your air. Our Clean Sense IQ™ technology tracks this fluctuation in real time and adjusts as it detects particles. To determine if the sensor is working correctly, spray perfume or aerosol cleaning product near the sensor on the back of the air purifier. Please visit sharkclean.com/support for more information.	
	Why is my air quality never at 100%?	If your air quality never reaches 100%, make sure that the HEPA filter is properly installed and that its original plastic packaging has been removed. Activities like smoking, burning candles, running a humidifier, opening windows, and cooking (among other things) can add more pollutants to your air. Make sure to survey your environment and remove anything that could be causing low air quality.	
	Why is my air quality always at 0%?	If the problem persists after these checks, the air quality sensor on the back of the air purifier may be dirty, causing a false reading. First, turn off and unplug the unit. Remove the mesh dust filter to locate the sensor on the back. Use a hand vacuum or hose attachment to clean the area around the sensor. After cleaning, wait 30 seconds before plugging the unit back in and turning it on. Let it run for 24 hours and monitor the air quality.	
Mesh Dust Filter	What is the mesh dust filter for?	This easy-to-clean mesh dust filter captures large debris like hair, dust, and lint to protect the 3-layer HEPA filter. Maintenance is required on this filter when indicated on the front display. Refer to the Mesh Dust Filter Maintenance section for more information.	
Mesh Fil	How do I know when to clean the pre-filter?	When the mesh dust filter needs maintenance, the front display will show a pulsing red ring along with the text "check dust filter." Refer to the Mesh Dust Filter Maintenance section for more information.	
HEPA Filter	Can I wash the HEPA filter?	No, the HEPA filter is not washable. Keep filter away from water and dispose of it when it is dirty.	

#### **Customer Service**

For further assistance, call 1-855-523-4061.

#### MESH DUST FILTER MAINTENANCE

#### Checking the Mesh Dust Filter:

When the mesh dust filter needs maintenance, the front display will show the following screen with a pulsing red ring:

#### **Cleaning the Mesh Dust Filter:**

When the Check Dust Filter message appears on the front display, remove the dust filter and inspect it for debris. If maintenance is required, be sure to **KEEP THE AIR PURIFIER PLUGGED IN** and running, and complete the following steps:

Gently slide up the filter and remove it. Check the screen for dust and debris buildup.

Use a **vacuum cleaner** on low speed with a soft brush attachment OR a **cloth/towel** to remove debris from the mesh screen. **DO NOT use abrasive chemical cleaners.** 

If additional cleaning is required, rinse the mesh dust filter with room temperature tap water. Be sure to completely dry the screen for 12 hours before reinstalling. **DO NOT USE** the air purifier when mesh filter is wet.

4. REINSTALL MESH DUST FILTER

Gently reinsert the mesh dust filter into the slot on the side of the air purifier. Be sure to push the dust filter into place until it is flush with the air purifier body.

Once the filter has been cleaned and reinstalled, the air purifier will recalibrate and begin to analyze air quality, indicated by the rotating lights.

**Note:** NeverChange HEPA Filter Technology allows up to 5 years\* of use from a single HEPA filter. \*Tested to GB/T18801-2015 P.CCM, based on 50% CADR declined, 52 sq. ft. cleaning area and 12 hours daily operation on MAX fan speed. NOTE: Unplug the air filter whenever doing any cleaning or maintenance (other than checking the mesh dust filter.)

#### **Exterior Cleaning:**

For best results, clean the exterior every two months or as needed. Use a microfiber cloth to remove dust. To clean, wipe down the exterior with a microfiber cloth dampened with warm, soapy water. Avoid excess water and abrasive chemical cleaners to prevent damage.

#### **Interior Cleaning:**

For best results, clean the interior of the air purifier every two months or as needed. Remove the filter door, take out the HEPA filter, and use a vacuum cleaner or a microfiber cloth to remove dust and debris from the interior. **DO NOT** use abrasive chemical cleaners or water on the inside of the air purifier.

#### AVAILABLE ACCESSORIES

#### ORDER ADDITIONAL ACCESSORIES AND REPLACEMENT FILTERS

Additional accessories and replacement filters are available on **sharkaccessories.com** 

#### Shark NeverChange® Anti-Allergen True HEPA Filter

Captures 99.98%\* of large, small, and microsized particles from the air and is equipped with 240  $\pm$  10g virgin carbon for heightened protection against household odors.

\*Based on IEST-RPCC007.3, 0.1-0.2 microns.

#### Shark NeverChange PetPro filter

Captures 99.98%\* of large, small, and micro-sized particles from the air and is equipped with 90 ± 10g virgin carbon for heightened protection against household odors. Contains 25% more carbon for odor absorption\*\*.

\*Based on IEST-RPCC007.3, 0.1-0.2 microns.

\*\*Compared to the Shark NeverChange Anti-Allergen True HEPA Filter.

#### **TWO (2) YEAR LIMITED WARRANTY**

5.

The Two (2) Year Limited Warranty applies to purchases made from authorized retailers of **SharkNinja Operating LLC.** Warranty coverage applies to the original owner and to the original product only and is not transferable.

SharkNinja warrants that the unit shall be free from defects in material and workmanship for a period of two (2) years from the date of purchase when it is used under normal household conditions and maintained according to the requirements outlined in the Owner's Guide, subject to the following conditions and exclusions:

#### CA RESIDENTS ONLY:

The Two (2) Year Limited Warranty period begins on the original date of delivery or pickup.

#### What is covered by this warranty?

- The original unit and/or non-wearable parts deemed defective, in SharkNinja's sole discretion, will be repaired or replaced up to two (2) years from the original purchase date.
- In the event a replacement unit is issued, the warranty coverage ends six (6) months following the receipt date of the replacement unit or the remainder of the existing warranty, whichever is later. SharkNinja reserves the right to replace the unit with one of equal or greater value.

#### What is not covered by this warranty?

- Normal wear and tear of wearable parts (such as filters), which require regular maintenance and/or replacement to ensure the proper functioning of your unit, are not covered by this warranty. Replacement parts are available for purchase at **sharkaccessories.com**.
- 2. Any unit that has been tampered with or used for commercial purposes.
- 3. Damage caused by misuse, abuse, negligent handling, failure to perform required maintenance (e.g., not replacing the filters), or damage due to mishandling in transit.

#### How to get service

If your appliance fails to operate properly while in use under normal household conditions within the warranty period, visit **sharkclean.com/ support** for product care and maintenance self-help. Our Customer Service Specialists are also available at **1-855-523-4061** to assist with product support and warranty service options, including the possibility of upgrading to our VIP warranty service options for select product categories. So we may better assist you, please register your product online at registeryourshark.com and have the product on hand when you call.

Defects caused by repair persons not authorized by SharkNinia. These

defects include damages caused in the process of shipping, altering, or

repairing the SharkNinja product (or any of its parts) when the repair is

performed by a repair person not authorized by SharkNinja.

SharkNinja will cover the cost for the customer to send in the unit to us for repair or replacement. A fee of \$25.95 (subject to change) will be charged when SharkNinja ships the repaired or replacement unit.

#### How to initiate a warranty claim

You must call **1-855-523-4061** to initiate a warranty claim. You will need the receipt as proof of purchase. We also ask that you register your product online at registeryourshark.com and have the product on hand when you call, so we may better assist you. A Customer Service Specialist will provide you with return and packing instruction information.

#### How state law applies

This warranty gives you specific legal rights, and you also may have other rights that vary from state to state. Some states do not permit the exclusion or limitation of incidental or consequential damages, so the above may not apply to you.

#### FCC WARNINGS

Note: This unit has been tested and found to comply with FCC limits for Class B digital devices. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This unit generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

To see if this unit interferes with radio or television reception, try turning it off and on.

To correct any interference:

- Reorient or relocate the receiving antenna.
- Increase the distance between the unit and the receiver.
- Connect the unit to a different outlet than the receiver.
- Consult the dealer or an experienced technician for help.

Caution: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate it
