

## MAINTENANCE

### Brushroll/Soft Roller Access

1. To open the brushroll garage, slide both release buttons on the floor nozzle away from you, towards the back of the nozzle, then lift off the lid.

2. To close the brushroll garage, insert the 3 tabs on top of lid into the 3 slots in the nozzle, then push down on both sides of lid until it clicks securely into place. If Brushroll Indicator Light is green and headlights are flashing, check again that both sides of lid are locked in place.

### Brushroll Maintenance

With the garage lid removed, carefully clear away any debris that may be impeding the brushroll.

**NOTE:** If you see any hair wrapped around the brushroll, continue cleaning, using Setting II, Carpet, on bare floors. This will allow the self-cleaning brushroll to remove the hair wrap and send it to the dust cup.

### Empty the dust cup every time debris reaches the MAX fill line.

### Cleaning the Soft Roller

Lift out the Soft Roller by pulling the tab on the right side. Clear away any debris, then slide the Soft Roller back into place.

### Checking the Nozzle for Blockages

Tilt the neck of the nozzle back to straighten the airway, then remove any blockages.
