

WHAT TO EXPECT

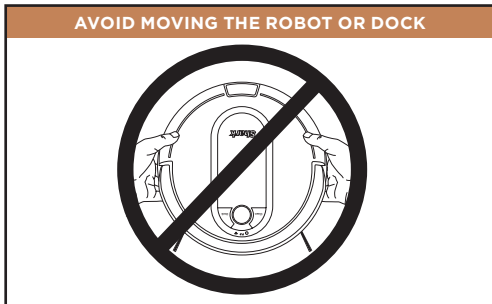

As your robot learns your home, you may need to make some small adjustments to optimize performance.

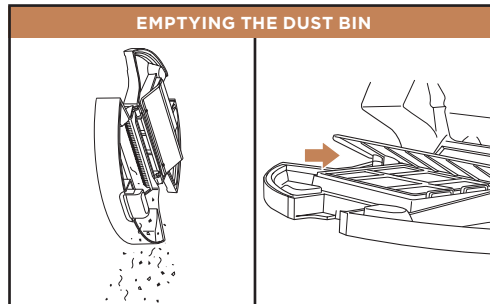

Depending on your home layout, your robot may take several runs to build a complete map.

For a constant state of clean, set up a cleaning schedule in the app.

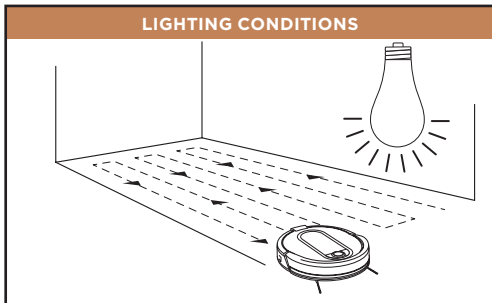

While your robot is cleaning, do not pick it up and move it, or move the charging dock—this could impact the robot's ability to map your home.

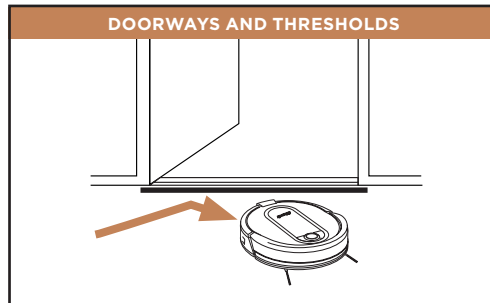

During the first few weeks of use, the dust bin will need to be emptied frequently. Empty debris and dust into trash.

Look between the filter and plastic shield and make sure there is no debris buildup.

Run your robot in well-lit conditions. If you are running your robot at night, make sure to turn on the lights.

Your robot can easily climb over most common thresholds. However, in some situations they may present a challenge. Use BotBoundary® strips to block off these areas.

Please be sure to read the enclosed Shark® Owner's Guide prior to using your robot.

Shark IQ ROBOT™

QUICK START GUIDE

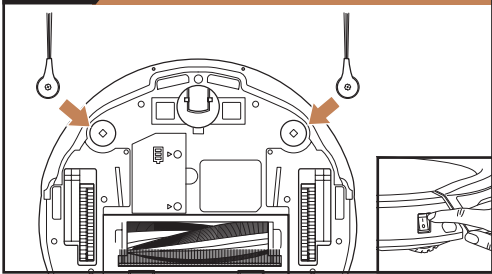

To stay current on our latest updates and features,
DOWNLOAD THE SHARKCLEAN APP.

Search "SharkClean" in the app store.

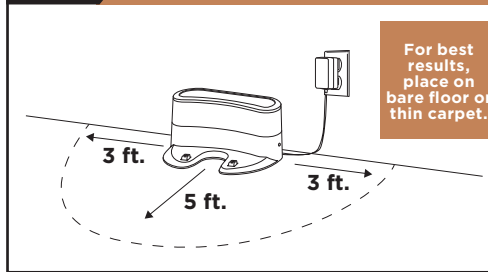

SETUP

STEP 1 PREP THE ROBOT

Remove protective film from robot and dock, attach side brushes, and power robot on.

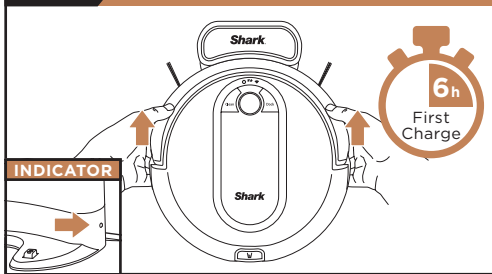

STEP 2 SET UP THE DOCK

For best results, place on bare floor or thin carpet.

Find a **permanent** location for the dock in a central area with a strong Wi-Fi signal. Place the dock with its back against the wall, and connect the charging cord to the back. The **Indicator Light** will illuminate green when the dock has power.

STEP 3 CHARGE THE ROBOT

Place robot on dock to charge. The dock indicator light will flash blue and the robot will beep when charging begins.

STEP 4 DOWNLOAD THE APP

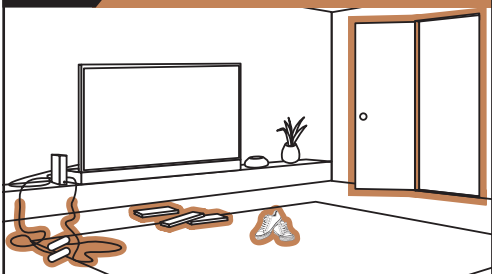

Search "SharkClean" in the app store or scan the QR code and download.

NOTE: For more information on connecting your robot, see next page.

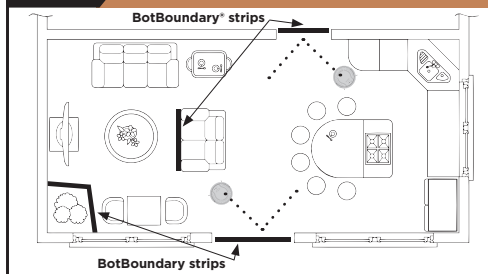

OPTIMIZING YOUR HOME FOR CLEANING

STEP 5 PREP YOUR HOME

Clear cords and remove small objects like toys, clothing, or drapes from floors. Open interior doors where you want your robot to clean.

STEP 6 SET UP FOR SUCCESS

Use the BotBoundary strips to keep your robot out of the areas you would like it to avoid:

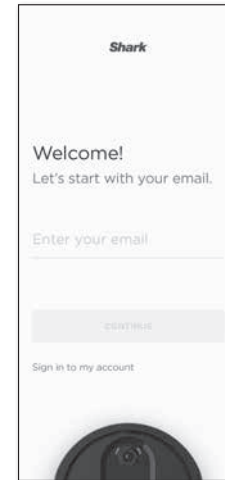

- Near power cords or phone chargers that might cause tangles
- In front of high thresholds

CONNECTING THE SHARKCLEAN APP AND ROBOT

Search SharkClean in the app store and download to get started.

STEP 1 Create An Account

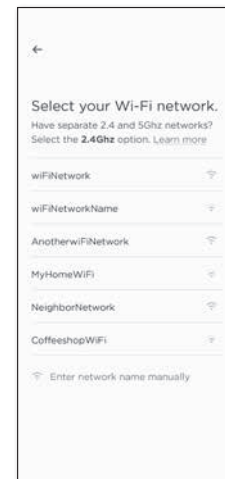

- Open the **SharkClean** app and set up your account.

STEP 4 Connect To Home Wi-Fi

- Select your home Wi-Fi network and enter your password.

NOTE: Most networks are 2.4ghz—your app will only work on this type.

STEP 2 Activate Robot Wi-Fi

- Hold down **Dock** and **Clean** buttons simultaneously until the **Wi-Fi light** (📶) on the robot blinks.

STEP 5 Success!

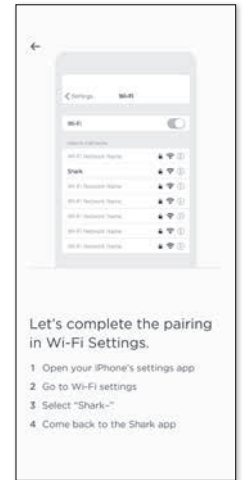

- When pairing is complete, the **Success** screen will appear.

Apple iOS Only

STEP 3 Select Robot

- Exit the app and open Wi-Fi settings.
- Select your robot (Ex. Shark_RVXXX) from the menu.
- Exit settings and return to the SharkClean app.

Questions?

Two Easy Steps If You're Stuck:

1. Having trouble connecting to your robot? Call **1-888-228-5531** for robot support.
